

# 5 Key Steps to Improve HPV Vaccination Rates

HPV vaccine  
prevents cancer in  
males and females

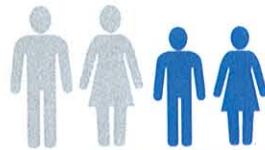

## LEARN

HPV vaccination is a  
public health priority

## INFORM

Ensure staff/colleagues deliver  
accurate and consistent HPV  
vaccination messages

## COMMUNICATE

Share HPV vaccination  
benefits with parents/patients  
at every opportunity

## RECOMMEND

Offer HPV first with  
other vaccines:  
same way, same day

## VACCINATE

Routinize procedures  
to reduce missed  
opportunities

Make HPV Vaccination Routine
